LinkedIn: [linkedin.com/in/maulik-agarwal-039b73297](https://www.linkedin.com/in/maulik-agarwal-039b73297)

Computer Science undergraduate at Birla Institute of Technology, Mesra with strong foundation in backend development, and object-oriented programming. Experienced in building data-driven backend systems using Python frameworks and cloud platforms. Passionate about distributed systems, scalable platform architecture, and backend engineering.

Education

- Birla Institute of Technology, Mesra Ranchi – BTECH CSE | (CGPA-8.6) | December 2022 - June 2026
- Maheshwari Public School Jaipur, Rajasthan – 12th Boards | Science – (90.2%) | April 2021 - April 2022
- Maheshwari Public School Jaipur, Rajasthan – 10th Boards | (93.8%) | April 2019 – April 2020

Professional Experience

Data Engineering Intern | Celebal Technologies (June 2025 – July 2025) | Python, SQL, Azure

- Developed a backend system to connect Python applications with remote SQL Server databases hosted on cloud infrastructure.
- Implemented user authentication, logging, and database CRUD operations for secure data management and built a modular backend architecture enabling scalable database interaction across remote environments.
- Worked with Azure-based cloud services for remote database connectivity and data storage.

AI Developer Intern | Bolt-lot Inventrom Pvt Ltd (Apr'24-May'24) | Python, OpenAI

- Developed an AI powered educational course content generator using OpenAI API.
- Built backend logic using Flask to manage API requests, server responses and data processing and designed application workflows following modular programming.

Projects

Personal-AI-Health-Assistant | HTML,CSS,Flask

- Built a full-stack AI assistant that processes user prompts and generates health-related recommendations.
- Implemented backend logic using Flask to manage request processing and added features for real-time text generation, clipboard export, and UI-based interaction.

Flower Image Detection Model | Python,SK-Learn,Pytorch

- Developed a CNN-based image classification model trained on flower datasets for automated species detection and applied data preprocessing, augmentation, and deep learning techniques for image recognition.
- Achieved 51% accuracy with custom CNN and 73% accuracy using ResNet architecture.

Skills

Programming Languages: Java, Python, C++, SQL, JavaScript, C, HTML, CSS

Backend Development: REST APIs, Flask, SQL Server, MongoDB, Node, Express, React

Frameworks/Libraries: Pandas, NumPy, Scikit-Learn, PyTorch

Cloud & Tools: Azure, Apache Spark, Cloud Computing, Docker, Airflow, Kafka, VS Code, Git, Excel, Tableau

Concepts: Object-Oriented Programming, Data Structures, Algorithms, Distributed Systems, Data Visualization

Soft Skills: Analytical, Problem Solver, Communication, Adaptability, Time Management

Achievements

- Achieved 2 star rating on CodeChef and Solved 400+ questions on Leetcode coding platform.
- Achieved 5th position in Battle of Bytes team based coding competition held in college.
- Ranked top 3 in SmartIndiaHackathon(SIH)-internal hackathon held in college with our project-online system to Interconnect Alumni and Student.
